

Protect Your Distribution Centers with Sonitrol Total Security

A Better System

Traditional security systems are limited by the size and layout of a distribution center. To establish comprehensive security, traditional systems must place multiple motion-based sensors throughout the facility to protect each door, aisle or row of goods. And even then, vulnerabilities exist in the ceilings and walls, an increasingly popular entry point for would-be thieves.

Sonitrol's intrusion alarm solution is sound-based and can cover 5,000 square feet. Strategically placed, Sonitrol's audio security system provides floor-to-ceiling, and wall-to-wall coverage — ideal for distribution centers of any size.

Sonitrol False Alarm Guarantee

Make false alarms a thing of the past.

- With our intelligent audio and video verification, Sonitrol is able to immediately determine whether a break-in is in progress, or whether a false alarm has sounded.
- Sonitrol's False Alarm Guarantee gives you peace of mind, and a heavier wallet.
